## TELEPHONE RECORD

On July 9, 1996, I called to speak with Carol H. Byington, PhD. to discuss sampling conducted by REACT in the fall of 1994 since REACT was observed by OHM Corporation conducting sampling during that time. The gentlemen who answered the phone told me that Carol was no longer with REACT. I asked him if he had information about sampling conducted by REACT in the fall of 1994 on Grand Street in Granite City, Illinois. He told me that he would try to pull the file and called me back. He called me back on July 9th and told me the following. REACT was hired by Coburn & Croft to conduct core samples on various properties for lead in Granite City. I thanked him the information.
